information professionals need to make the most precise estimate. The fourth edition has been updated to reflect the changing materials, techniques, and practices in the field, and provides the most recent Means cost data available. The complexity of electrical systems can make accurate estimation difficult, but this guide contains all the necessary information in one place. An electrical estimate represents the total cost for materials, labor, overhead and profit, but accuracy is virtually impossible without a basic knowledge of the field, and real-world experience in the type of work required. Inaccurate estimates lead to problems with customer satisfaction, which often create payment issues. A thorough, complete, and accurate estimate is in the best interest of all parties involved in the work. Electrical Estimating Methods provides more than just data. Detailed discussions about the work itself help highlight factors that may escape notice, and access to the latest cost data helps tie everything together. Features include: Discussion of current equipment, materials, and processes Means data for both residential and commercial projects Case studies that illustrate best practices Online access to the latest Means data for fast access on the job The book discusses specific situations as well as general practices, and provides comprehensive guidance to the creation of a true, current, estimation of costs. For electrical contractors and estimators, Electrical Estimating Methods contains must-have content that simplifies the estimating process.

Pattern of the Land-Eileen Apperson 2012-03 Eileen Apperson has always felt a visceral reaction to landscapes. The one she lives in has been compromised and altered, making her relationship to this place

all the more complicated. The San Joaquin Valley has gone through series of transitions to become the worlds greatest agricultural region. To reach such status, the land has gone through sweeping alterations over the past 150 years. This has been due to a series of events brought about by missionaries, trappers, cattlemen famers, and finally a growing urban population. Pattern of the Land explores each of these stages in the valley's history by describing the uniqueness of its terrain. What brings this recorder upon the land closer is that the most significant of these changes have come at the hands of her family, the first settlers in a frontier. Pattern of the Land weaves family stories with historic accounts, focusing primarily on the region where the Kings River descends the Sierra to the area that was Tulare Lake. These sketches guide her search fit home in an altered landscape. Family has been one constant in the place she has grown to appreciate and is now proud to call home.

There is something about their chunky, powerful build and their often risky but vital work that excites our interest and admiration. The captains and crews of the tugboats are justifiably proud of what they do, and they have some great stories to tell about the ships and barges they tow or push; the harbors, storms, tides, and dangerous passages they must negotiate; the unions; the pilots; the different designs and capabilities of their boats; and the way the boats and their livelihood are irrevocably changing.

In the Skin House-Jeni Couzyn 1993 The culmination of Jeni Couzyn's Selected Poems, Life by Drowning, was a new body of powerful, mystical poetry, including A Time To Be Born and The Coming of the Angel. In her latest collection, In the Skin House, she continues her journey of self-discovery in probing poems that are remarkable not just for their spiritual qualities but also for their tender lyricism and sense of wonder. The Sufi writer Llewellyn Vaughan-Lee calls In the Skin House Jeni Couzyn's own inner story: 'Her mysticism is neither abstract nor ascetic, but belongs to the school of lovers like Mary Magdalene... She does not deny the body, but embraces it and goes beyond its boundaries. She is a woman in the arms of her inner lover, surrendering to the mystery of the soul.' Rosemary Sullivan writes: 'When I think of In the Skin House, I think of the drawings of Paul Klee or the love poems of Rumi; of spirit tracks that must be followed intuitively. If, for something to hang on to, you were to try to read these poems as an amalgam of spiritual traditions - a bit of Western gnosticism mixed with Eastern mysticism - you would miss their delicacy, for the only way to read them is to submit to the poems themselves. They create their own language of discovery.'

American Planer, Shaper and Slotter Builders-Kenneth L. Cope 2002 Here is the first book to identify American builders of planers, shapers and slotters, who operated throughout the 19th and early 20th centuries. Written in the style of the author's previous groundbreaking books on the American machine tool industry, this volume provides the reader with invaluable information on over 300 makers. Some are very well known, but many have previously gone virtually unrecognized by researchers. More than 1000 illustrations, taken from original catalogs and contemporary periodicals, show how these machines developed: starting out in the early 1800s as crude, hand-built copies of English machines and becoming, over the course of a century, monster machines weighing nearly one million pounds, unmatched elsewhere in the world. Numerous machine accessories, such as chucks, dividing heads, milling attachments and keyseating attachments, among others, are identified and illustrated. In addition, the book includes a glossary of terms used in describing the various types of planers, shapers and slotters, and provides illustrations that help identify the individual parts of the machines.
