Digital Minds (2)-WSI 2015-11-25 The progression of the Internet hasn't slowed down one bit; in fact, it's only just begun. And with capabilities like visitor tracking, geo-targeting and personalized marketing, the business competition on the digital playing field has become more aggressive than ever. The advancements are rapid; adaptation is vital. And yet, business owners are either too tentative to dive in or want to get started but just don't know where to begin. In the 2nd edition of WSI's Digital Minds, we provide a map (literally!) that's designed to help professionals navigate through the complexities of the digital marketing realm. Fourteen of WSI's thought-leaders explore how online strategies like web design, marketing automation, eCommerce, SEO, reputation management, email marketing and more have been shaped by online consumers and their mobile device du jour! By evolving alongside the growing trends, your brand will be equipped to leave the competition far behind.

Towards 5G-Rath Vannithamby 2017-01-30 This book brings together a group of visionaries and technical experts from academia to industry to discuss the applications and technologies that will comprise the next set of cellular advancements (5G). In particular, the authors explore usages for future 5G communications, key metrics for these usages with their target requirements, and network architectures and enabling technologies to meet 5G requirements. The objective is to provide a comprehensive guide on the emerging trends in mobile applications, and the challenges of supporting such applications with 4G technologies.

Implementing an IBM High-Performance Computing Solution on IBM Power System S822LC-Dino Quintero 2016-07-25 This IBM® Redbooks® publication demonstrates and documents that IBM Power Systems™ high-performance computing and technical computing solutions deliver faster time to value with powerful solutions. Configurable into highly scalable Linux clusters, Power Systems offer extreme performance for demanding workloads such as genomics, finance, computational chemistry, oil and gas exploration, and high-performance data analytics. This book delivers a high-performance computing solution implemented on the IBM Power System S822LC. The solution delivers high application performance and throughput based on its built-for-big-data architecture that incorporates IBM POWER8® processors, tightly coupled Field Programmable Gate Arrays (FPGAs) and accelerators, and faster I/O by using Coherent Accelerator Processor Interface (CAPI). This solution is ideal for clients that need more processing power while simultaneously increasing workload density and reducing datacenter floor space requirements. The Power S822LC offers a modular design to scale from a single rack to hundreds, simplicity of ordering, and a strong innovation roadmap for graphics processing units (GPUs). This publication is targeted toward technical professionals (consultants, technical support staff, IT Architects, and IT Specialists) responsible for delivering cost effective high-performance computing (HPC) solutions that help uncover insights from their data so they can optimize business results, product development, and scientific discoveries

E-Learning and Games-Abdenmour El Rhalibi 2019-07-16 This book constitutes the refereed proceedings of the 12th International Conference on e-Learning and Games, EDUTAINMENT 2018, held in Xi'an, China, in June 2018. The 32 full and 32 short papers presented in this volume were carefully reviewed and selected from 85 submissions. The papers were organized in topical sections named: virtual reality and augmented reality in edutainment; gamification for serious game and training; graphics, imaging and applications; game rendering and animation; game rendering and animation and computer vision in edutainment; e-learning and game; and computer vision in edutainment.

MRI for Radiotherapy-Gary Liney 2019-06-20 This book provides, for the first time, a unified approach to the application of MRI in radiotherapy that incorporates both a physics and a clinical perspective. Readers will find detailed information and guidance on the role of MRI in all aspects of treatment, from dose planning, with or without CT, through to response assessment. Extensive coverage is devoted to the latest technological developments and emerging options. These include hybrid MRI treatment systems, such as MRI-Linac and proton-guided systems, which are ushering in an era of real-time MRI guidance. The past decade has witnessed an unprecedented rise in the use of MRI in the radiation treatment of cancer. The development of highly conformal dose delivery techniques has led to a growing need to harness advanced imaging for patient treatment. With its flexible soft tissue contrast and ability to acquire functional information, MRI offers advantages at all stages of treatment. In documenting the state of the art in the field, this book will be of value to a wide range of professionals. The authors are international experts drawn from the scientific committee of the 2017 MR in RT symposium and the faculty of the ESTRO teaching course on imaging for physicists.

Inventive Communication and Computational Technologies-G. Ranganathan 2020-01-29 This book gathers selected papers presented at the Inventive Communication and Computational Technologies conference (ICICCT 2019), held on 29-30 April 2019 at Gnanamani College of Technology, Tamil Nadu, India. The respective contributions highlight recent research efforts and advances in a new paradigm called ISMAC (IoT in Social, Mobile, Analytics and Cloud contexts). Topics covered include the Internet of Things, Social Networks, Mobile Communications, Big Data Analytics, Bio-inspired Computing and Cloud Computing. The book is chiefly intended for academics and practitioners working to resolve practical issues in this area.

China's Mobile Economy-Winston Ma 2016-12-27 "The book will focus on three major areas of the digital economy in China that are, by nature, inter-linked: (a) The boom of e-commerce on consumer goods. Alibaba's online shopping platforms Taobao and Tmall have nearly twice as many active buyers than the U.S. site eBay. It has already disrupted new shopping malls in China, but itself is also being disrupted by the mobile culture and social network. The mobile disruption in China is more thorough than the developed world: immature industries such as retail and logistics will leapfrog straight from the early industrial age to the internet one. (b) The beginning of the multi-screen age and mobile Internet for China consumers. The mobile consumption is growing so rapidly that the shopping malls, a new development in China by itself, have already been disrupted by online-to-offline (O2O) retail consumption. What's more, the growth and positive spillovers go beyond consumer goods sector to services, entertainment, media, finance and even traditional industry sectors. (c) Mobile internet is more about lifestyle and entertainment for China's online community (which tends to be younger than that in the US). The Chinese youth are pouring money into online games, video and music downloading, and virtual goods/ online personas in imaginary worlds. To meet the quest for high quality contents, the tech giants are not only betting on set-top box to convert TV and theatre viewers to online but also creating their own contents; meanwhile, the China market is changing the DNA of Hollywood's blockbuster movies"--

Architects of Change-Jeremy Ghez 2019-09-09 What is the difference between a fire fighter and an architect? One deals with crises as they arise while the other is capable of building something that can withstand all weathers. Using this analogy, Architects of Change provides you with the tools to grasp, leverage and harness the dynamics that shape tomorrow's markets. It encourages you to nurture an entrepreneurial mind-set to transform the way a business - or even an entire industry - operates. Tackling crucial topics related to geopolitics, creative destruction, fake news, resilience and creativity, this book gives you the tools to analyse your environment and future trends in order to reinvent the way you do business. It teaches you how to: · Identify actors of change · Conduct simulations about the future · Assess threats of political instability · Build a strategy for a profitable and sustainable firm amid ongoing uncertainty · Become an architect of change yourself. Containing original interviews with industry insiders, including a world-famous expert on brands and luxury, the former CEO of a major think tank, a thought leader from CISCO, the former chairman of the US National Intelligence Council, and a former chief political scientist of a large Asian bank, this book helps you to understand the type of imagination and creativity this business environment requires not only to survive, but thrive.

A Star Is Bored-Byron Lane 2020-07-28 "A Star is Bored is an absolute knockout. Riotously funny and wickedly tender." — Taylor Jenkins Reid, New York Times bestselling author of Daisy Jones and the Six People Magazine Best Book of Summer 2020 - Named a Must-Read Summer book by Town & Country - Named One of the 14 Best Books of Summer 2020 by Harper's Bazaar - One of Library Journal's 2020 "Titles to Watch" - One of the 30 Best Beach Reads According to Parade Magazine The Devil Wears Prada meets Postcards From the Edge in a hilariously heartfelt novel influenced in part by the author's time assisting Carrie Fisher. Charlie Besson is tense and sweating as he prepares for an insane job interview. His car is idling, like his life, outside the Hollywood mansion of Kathi

Kannon, star of stage and screen and People magazine's worst dressed list. She needs an assistant. He needs a hero. Kathi is an icon, bestselling author, and an award winning actress, most known for her role as Priestess Talara in a blockbuster sci-fi film. She's also known in another role: crazy. Admittedly so. Famously so. Fabulously so, as Charlie quickly discovers. Their three year odyssey is filled with late night shopping sprees, last minute trips to see the aurora borealis, and an initiation to that most sacred of Hollywood tribes: the personal assistant. But Kathi becomes much more than a boss, and as their friendship grows, Charlie must make a choice. Will he always be on the sidelines of life, assisting the great forces that be, or can he step into his own leading role? Laugh-out-loud funny, and searingly poignant, Byron Lane's *A Star is Bored* is a novel that, like the star at its center, is enchanting and joyous, heartbreaking and hopeful. Sayings and Anecdotes-Diogenes 2012-05-10 A unique edition of the sayings of Diogenes, whose biting wit and eccentricity inspired the anecdotes that express his Cynic philosophy. It includes the accounts of his immediate successors, such as Crates and Hipparchia, and the witty moral preacher Bion. The contrasting teachings of the Cyrenaics and the hedonistic Aristippos complete the volume.

Financial Cryptography and Data Security-Nicolas Christin 2014-11-08 This book constitutes the thoroughly refereed post-conference proceedings of the 18th International Conference on Financial Cryptography and Data Security (FC 2014), held in Christ Church, Barbados, in March 2014. The 19 revised full papers and 12 short papers were carefully selected and reviewed from 165 abstract registrations and 138 full papers submissions. The papers are grouped in the following topical sections: payment systems, case studies, cloud and virtualization, elliptic curve cryptography, privacy-preserving systems, authentication and visual encryption, network security, mobile system security, incentives, game theory and risk, and bitcoin anonymity.

Implementing an IBM High-Performance Computing Solution on IBM POWER8-Dino Quintero 2015-09-15 This IBM® Redbooks® publication documents and addresses topics to provide step-by-step programming concepts to tune the applications to use IBM POWER8® hardware architecture with the technical computing software stack. This publication explores, tests, and documents how to implement an IBM high-performance computing (HPC) solution on POWER8 by using IBM technical innovations to help solve challenging scientific, technical, and business problems. This book demonstrates and documents that the combination of IBM HPC hardware and software solutions delivers significant value to technical computing clients in need of cost-effective, highly scalable, and robust solutions. This book targets technical professionals (consultants, technical support staff, IT Architects, and IT Specialists) who are responsible for delivering cost-effective HPC solutions that help uncover insights among clients' data so that they can act to optimize business results, product development, and scientific discoveries.

Chinese Archery-Stephen Selby 2000-01-01 Chinese Archery is a broad view of traditional archery in China as seen through the eyes of historians, philosophers, poets, artists, novelists and strategists from 1500 BC until the present century. The book is written around parallel text translations of classical Chinese sources some famous and some little known in which Chinese writers give vivid and detailed explanations of the techniques of bow-building, archery and crossbow technique over the centuries. The author is both a sinologist and practising archer; his translations make the original Chinese texts accessible to the non-specialist. Written for readers who may never have picked up a book about China, but still containing a wealth of detail for Chinese scholars, the book brings the fascinating history of Chinese archery back to life through the voices of its most renowned practitioners.

To the Cloud-Vincent Mosco 2015-11-17 Cloud computing and big data are arguably the most significant forces in information technology today. In the wake of revelations about National Security Agency (NSA) activities, many of which occur "in the cloud", this book offers both enlightenment and a critical view. Vincent Mosco explores where the cloud originated, what it means, and how important it is for business, government and citizens. He describes the intense competition among cloud companies like Amazon and Google, the spread of the cloud to government agencies like the controversial NSA, and the astounding growth of entire cloud cities in China. Is the cloud the long-promised information utility that will solve many of the world's economic and social problems? Or is it just marketing hype? To the Cloud provides the first thorough analysis of the potential and the problems of a technology that may very well disrupt the world.

5G Wireless Systems-Yang Yang 2017-09-14 This book focuses on key simulation and evaluation technologies for 5G systems. Based on the most recent research results from academia and industry, it describes the evaluation methodologies in depth for network and physical layer technologies. The evaluation methods are discussed in depth. It also covers the analysis of the 5G candidate technologies and the testing challenges, the evolution of the testing technologies, fading channel measurement and modeling, software simulations, software hardware cosimulation, field testing and other novel evaluation methods. The fifth-generation (5G) mobile communications system targets highly improved network performances in terms of the network capacity and the number of connections. Testing and evaluation technologies is widely recognized and plays important roles in the wireless technology developments, along with the research on basic theory and key technologies. The investigation and developments on the multi-level and comprehensive evaluations for 5G new technologies, provides important performance references for the 5G technology filtering and future standardizations. Students focused on telecommunications, electronic engineering, computer science or other related disciplines will find this book useful as a secondary text. Researchers and professionals working within these related fields will also find this book useful as a reference.

The total of 131 regular papers presented in part I and part II was carefully reviewed and selected from 535 submissions; there are 52 papers in the applied data science, nectar and demo track. The contributions were organized in topical sections named as follows: Part I: adversarial learning; anomaly and outlier detection; applications; classification; clustering and unsupervised learning; deep learning; ensemble methods; and evaluation. Part II: graphs; kernel methods; learning paradigms; matrix and tensor analysis; online and active learning; pattern and sequence mining; probabilistic models and statistical methods; recommender systems; and transfer learning. Part III: ADS data science applications; ADS e-commerce; ADS engineering and design; ADS financial and security; ADS health; ADS sensing and positioning; nectar track; and demo track.

Cloud Computing- 1968

Cloud Computing-Dan C. Marinescu 2013-05-30 Cloud Computing: Theory and Practice provides students and IT professionals with an in-depth analysis of the cloud from the ground up. Beginning with a discussion of parallel computing and architectures and distributed systems, the book turns to contemporary cloud infrastructures, how they are being deployed at leading companies such as Amazon, Google and Apple, and how they can be applied in fields such as healthcare, banking and science. The volume also examines how to successfully deploy a cloud application across the enterprise using virtualization, resource management and the right amount of networking support, including content delivery networks and storage area networks. Developers will find a complete introduction to application development provided on a variety of platforms. Learn about recent trends in cloud computing in critical areas such as: resource management, security, energy consumption, ethics, and complex systems Get a detailed hands-on set of practical recipes that help simplify the deployment of a cloud based system for practical use of computing clouds along with an in-depth discussion of several projects Understand the evolution of cloud computing and why the cloud computing paradigm has a better chance to succeed than previous efforts in large-scale distributed computing

Also included: real-world @urbanjungleblog followers' FAQs; a section on plants and pets; and plant care for the different stages of a houseplant's life. The focus is on using plants to raise the positive energy of every room in the house and to live happily ever after with plants.

Diogenes of Sinope - Life and Legend, 2nd Edition-Diogenes Laertius 2016-05-29 Diogenes of Sinope is undoubtedly the most well-known Cynic philosopher from antiquity. We possess no direct writings from Diogenes himself, thus his legacy has been left for others to construct and discuss over the centuries. Over time, Diogenes' legacy became intermingled with legends about his life which makes it difficult for the scholar to reconstruct who exactly the "real" Diogenes was. We possess a faint idea of who the man was, and this book is meant to provide the raw material for the study of Diogenes and how his life and legacy shifted throughout the centuries. Using actual primary sources, this book allows the student and the scholar to use open-source texts to reconstruct the personhood of Diogenes of Sinope. The excerpts are a little longer than given in most similar books. The objective is to provide as much background information on the excerpts as possible. Sources: Aelian, Aesop, Aulus Gellius, Apuleius, Athenaeus, Augustine, Basil of Caesarea, Clement, Cicero, Dio Chrysostom, Diogenes Laertius, Epictetus, Greek Anthology, Julian, Lucian, Marcus Aurelius, Origen, Philostratus, Plutarch, Seneca, Socrates Scholasticus, Strabo, Tertullian The text is meant to be a handbook of source material for study.

Postindustrial East Asian Cities-Shahid Yusuf 2006-01-01 Drawing on a wide range of literature and on interviews with firms, this book explores issues of economic growth with a focus on six East Asian cities: Bangkok, Beijing, Seoul, Shanghai, Singapore, and Tokyo. It suggests how policies and institutions can induce and furnish an urban environment that supports innovative activities. A valuable resource for researchers, urban planners, urban geographers, and policy makers interested in East Asia.

Assessing the Impacts of Changes in the Information Technology R&D Ecosystem-National Research Council 2009-03-16 The U.S. information technology (IT) research and development (R&D) ecosystem was the envy of the world in 1995. However, this position of leadership is not a birthright, and it is now under pressure. In recent years, the rapid globalization of markets, labor pools, and capital flows have encouraged many strong national competitors. During the same period, national policies have not sufficiently buttressed the ecosystem, or have generated side effects that have reduced its effectiveness. As a result, the U.S. position in IT leadership today has materially eroded compared with that of prior decades, and the nation risks ceding IT leadership to other nations within a generation. Assessing the Impacts of Changes in the Information Technology R&D Ecosystem calls for a recommitment to providing the resources needed to fuel U.S. IT innovation, to removing important roadblocks that reduce the ecosystem's effectiveness in generating innovation and the fruits of innovation, and to becoming a lead innovator and user of IT. The book examines these issues and makes recommendations to strengthen the U.S. IT R&D ecosystem.

The Complete Diogenes of Sinope Collection-Diogenes of Sinope 2017-09-17 The tales of Diogenes, the Great Cynic Philosopher have delighted and enlightened all who have been fortunate enough to read of his deeds. Diogenes originated the then revolutionary concept of cosmopolitanism, insulted and won the admiration of Alexander the Great, and almost single handedly defined the Cynic Philosophy which eventually developed into the Stoic School. In his own life he journeyed from freeing his personal slave, to living in a clay barrel on the street, to being captured by pirates and becoming a slave himself. Considered the only true sage by the Stoics, none of Diogenes' many writings have survived, but details of his life and his teachings come in the form of anecdotes attributed to him in a number of scattered classical sources. This book is a complete collection of those early writings which thankfully have survived from antiquity to bring us these legends. The stories of Diogenes are surprising and funny, and at a deeper level they offer profound lessons through his piercing use of metaphor and symbolism. The instructions of Diogenes are just as relevant and sharp today as in his own time. True Power Books aims to provide a curated collection of history's most important writings in regards to the love of knowledge and personal growth presented clearly and without editorial additions, in the form of beautiful books worthy of display. Journal of the Fortean Research Center Paperbound-Ray Boeche 2012-07-01 The Fortean Research Center was founded in Lincoln, Nebraska in 1982. During the two decades of its existence, this volunteer group of researchers and investigators delved deep into the unexplained. Exploring events in Nebraska - and far beyond -that included ghosts, UFOs, Bigfoot encounters, animal mutilations, government cover-ups, alleged alien abductions, psychic phenomena, cult activity, and even a sighting of a blob-like mystery creature the Fortean Research Center became recognized among members of the Fortean, paranormal, and UFO research communities around the world, as a reliable and trusted source of information. Here is the entire collection of the Journal of the Fortean Research Center, 23 issues in all. These publications are a reflection of their time, and demonstrate in many cases the beginning steps into subjects familiar to the public today: alleged UFO crashes and landings at government installations, alien abductions, cryptozoology and more.

Firewalls Don't Stop Dragons-Carey Parker 2018-08-24 Rely on this practical, end-to-end guide on cyber safety and online security written expressly for a non-technical audience. You will have just what you need to protect yourself—step by step, without judgment, and with as little jargon as possible. Just how secure is your computer right now? You probably don't really know. Computers and the Internet have revolutionized the modern world, but if you're like most people, you have no clue how these things work and don't know the real threats. Protecting your computer is like defending a medieval castle. While moats, walls, drawbridges, and castle guards can be effective, you'd go broke trying to build something dragon-proof. This book is not about protecting yourself from a targeted attack by the NSA; it's about armoring yourself against common hackers and mass surveillance. There are dozens of no-brainer things we all should be doing to protect our computers and safeguard our data—just like wearing a seat belt, installing smoke alarms, and putting on sunscreen. Author Carey Parker has structured this book to give you maximum benefit with minimum effort. If you just want to know what to do, every chapter has a complete checklist with step-by-step instructions and pictures. The book contains more than 150 tips to make you and your family safer. It includes: Added steps for Windows 10 (Spring 2018) and Mac OS X High Sierra Expanded coverage on mobile device safety Expanded coverage on safety for kids online More than 150 tips with complete step-by-step instructions and pictures What You'll Learn Solve your password problems once and for all Browse the web safely and with confidence Block online tracking and dangerous ads Choose the right antivirus software for you Send files and messages securely Set up secure home networking Conduct secure shopping and banking online Lock down social media accounts Create automated backups of all your devices Manage your home computers Use your smartphone and tablet safely Safeguard your kids online And more! Who This Book Is For Those who use computers and mobile devices, but don't really know (or frankly care) how they work. This book is for people who just want to know what they need to do to protect themselves—step by step, without judgment, and with as little jargon as possible.

Cognitive Radio Oriented Wireless Networks-Paulo Marques 2018-02-26 This book constitutes the thoroughly refereed conference proceedings of the 12th International Conference on Cognitive Radio Oriented Wireless Networks, CROWNCOM 2017, held in Lisbon, Portugal, in September 2017. The 28 revised full papers presented were carefully reviewed and selected from numerous submissions and cover the evolution of cognitive radio technology pertaining to 5G networks. The papers are clustered to topics on spectrum management; network management; trials, test beds, and tools; PHY and sensing; spectrum management.

CMT Level II 2017-Mkt Tech Assoc 2017-01-10 Everything you need to pass Level II of the CMT Program CMT Level II 2017: Theory and Analysis fully prepares you to demonstrate competency applying the principles covered in Level I, as well as the ability to apply more complex analytical techniques. Covered topics address theory and history, market indicators, construction, confirmation, cycles, selection and decision, system testing, and statistical analysis. The Level II exam emphasizes trend, chart, and pattern analysis, as well as risk management concepts. This cornerstone guidebook of the Chartered Market Technician® Program will provide every advantage to passing Level II.

Cyberspace-Phil Williams 2016 "This volume has three parts: the first focuses on cyberspace itself; the second on some of the major forms of malevolence or threats that have become one of its defining characteristics; and the third on possible responses to these threats. One of the most significant features of cyberspace, however, is that it is becoming a risky place for the entire spectrum of users: nation-states, nongovernmental and transnational organizations, commercial enterprises, and individuals. Yet it is a space of opportunities -- for benevolent, neutral, and malevolent actors. Moreover, the authors identify and assess the challenges and threats to security that can arise in cyberspace because of its unique nature. In the final section, the authors discuss a variety of responses, with some suggesting that the most favored options being pursued by the United States are poorly conceived and ill-suited to the tasks at hand"-- Publisher's web site.
